

03/09/12 - Athletic Field Supplies

TURFACE MVP

Standing up to intense athletic traffic, Turface MVP provides solid, safe footing throughout the season. Used on athletic fields from the major leagues to local parks and recreation facilities, Turface MVP conditions soil to relieve compaction and manage moisture across baseball and softball infields. Turface MVP can be incorporated into a new or existing field, or applied as a top dressing to improve the surface and reduce bad ball hops that can cause injury.

TURFACE QUICK DRY

After a rain, Turface® QuickDry® makes muddy, slippery conditions a thing of the past. QuickDry will not cake, become slippery or leave an infield rock-hard upon drying. It features easy application as a topdressing during and after rains. Just apply QuickDry to wet areas or puddles, let the product begin to absorb the moisture, and rake the area to return to play time and time again. There is a reason Quick Dry is called the Game Saver!
