

Material Safety Data Sheet

BARESPOT MONOBOR-CHLORATE
EPA Reg. No. 33560-48

MSDS No. PSI-007
Date of Preparation: Nov. 1999

Section 1 - Chemical Product and Company Identification

Product/Chemical Name: BARESPOT MONOBOR-CHLORATE

Chemical Formula: N/A

Emergency Contact: 901-332-7052

Transportation Emergency Contact: CHEMTREC: 1-800-424-9300

Manufacturer: Pro-Serve, Inc., 400 E. Brooks Rd, Memphis, TN 38109, PH. 901-332-7052, Fax 901-346-7157

Section 2 - Composition / Information on Ingredients

| Ingredient Name | CAS Number | wt% |
|-----------------------------|------------|------|
| Sodium Chlorate | 7775-09-9 | 30.0 |
| Sodium Metaborate Anhydrous | 7775-19-1 | 48.5 |
| Inert Ingredients | | 21.5 |

| Ingredient | OSHA PEL | ACGIH TLV |
|-----------------------------|-----------|-----------|
| Sodium Chlorate | None est. | None est. |
| Sodium Metaborate Anhydrous | None est. | None est. |

Section 3 - Hazards Identification

☆☆☆☆☆ Emergency Overview ☆☆☆☆☆

Potential Health Effects

DANGER: Corrosive – causes eye and skin damage

Carcinogenicity: IARC, NTP, and OSHA do not list BARESPOT MONOBOR-CHLORATE as a carcinogen.

Section 4 - First Aid Measures

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give Oxygen. Call a physician.

Eye Contact: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Call a physician.

Skin Contact: In case of contact, immediately wash skin with soap and water. Wash contaminated clothing before reuse.

Ingestion: If swallowed, call a physician or poison control center immediately. Give large quantity of milk or egg whites, or if not available, drink large quantities of water.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage

Section 5 - Fire-Fighting Measures

Flash Point: None established

Flammability Classification: None

Extinguishing Media: Flood with water. Sodium chlorate will decompose at 570° and supply oxygen to the fire. Smothering type extinguishers are not effective.

Unusual Fire or Explosion Hazards: When burned, sodium chlorate gives off oxygen, which may feed the fire. Fire may also produce toxic thermal decomposition products.

Fire-Fighting Instructions: Evacuate downwind from fire, and approach from upwind, wearing a self-contained breathing apparatus. Do not release runoff from fire control methods to sewers or waterways.

Fire-Fighting Equipment: Wear a self-contained breathing apparatus (SCBA) with a full facepiece operated in pressure-demand or positive-pressure mode.

| NFPA Hazard Rating: | Health | Fire | Reactivity | Specific |
|---------------------|--------|------|------------|----------|
| Non-fire | 0 | 0 | 1 | N/A |
| Fire | 1 | 1 | 1 | N/A |

The NFPA Rating is a recommendation by the manufacturer using the guidelines or published evaluations prepared by the National Fire Protection Association (NFPA)

Section 6 - Accidental Release Measures

Spill /Leak Procedures: Shovel or sweep up. If exposed to rain, contain and prevent run-off. Do not contaminate any body of water.

Containment: For large spills, dike far ahead of liquid spill for later disposal. Do not release into sewers or waterways.

Regulatory Requirements: Follow applicable OSHA regulations (29 CFR 1910.120).

Section 7 - Handling and Storage

Handling Requirements: Do not get in eyes. Avoid contact with skin. Avoid contact with clothing. Wash clothing after use.

Storage Requirements: Keep container in a cool, dry place. Do not store on wood floors. Do not store or consume food, drink or tobacco in areas where they may become contaminated with this material.

Section 8 - Exposure Controls / Personal Protection

Ventilation: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs (Sec. 2). Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

Respiratory Protection: Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear an MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or non-routine operations (cleaning spills, reactor vessels, or storage tanks), wear an SCBA. **Warning! Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.** If respirators are used, OSHA requires a written respiratory protection program that includes at least: medical certification, training, fit-testing, periodic environmental monitoring, maintenance, inspection, cleaning, and convenient, sanitary storage areas.

Protective Clothing/Equipment: Wear chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact. Wear protective eyeglasses or chemical safety goggles, per OSHA eye- and face-protection regulations (29 CFR 1910.133). Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with contact lenses.

Safety Stations: Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Contaminated Equipment: Separate contaminated work clothes from street clothes. Launder before reuse. Remove this material from your shoes and clean personal protective equipment.

Comments: Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material, especially before eating, drinking, smoking, using the toilet, or applying cosmetics.

Section 9 - Physical and Chemical Properties

Physical State: Stable Solid

Appearance and Odor: White / grey pellets

Odor Threshold: N/A

Vapor Pressure: Negligible

Vapor Density (Air=1): N/A

Formula Weight: N/A

Density: 54 lb./ft.³

Specific Gravity (H₂O=1, at 4 °C): N/A

Particle Size: 1/8" to 1/4"

Water Solubility: >2 lbs./gal. @68°F

Other Solubilities: N/A

Boiling Point: N/A

Freezing/Melting Point: N/A

Viscosity: N/A

Refractive Index: N/A

Surface Tension: N/A

% Volatile: N/A

Auto Ignition Temperature: Non-combustible by nature

Section 10 - Stability and Reactivity

Stability: BARESPOT MONOBOR-CHLORATE is stable at room temperature in closed containers under normal storage and handling conditions.

Polymerization: Hazardous polymerization cannot occur.

Incompatibility: Avoid strong acids and bases.
