

CalPril

GRANULATED - PRILLED

LIMESTONE - Calcium Carbonate

For Turf, Farm, Lawns and Gardens

Easy to use 100% natural - organic plant nutrient that supplies calcium and sweetens the soil. Raises soil pH. Helps to structure soils and break up clay. Fine particles means that you can use less.

Up to 50% reduction in the need to fertilize

36% Calcium

Benefits:

- Easy to apply granules, high in calcium (Ca)
- Promotes healthy plant growth
- Reduces blossom end rot
- Sweetens soil (raises soil pH.)
- Helps to control moss
- Helps to structure soils
- Helps condition clay soils
- Reduces internal browning
- Ultra-low in heavy metals
- Helps reduce leaching high cation exchange
- Reduces the need for fertilizers
- Gives flavor and crispness to produce
- Needed on acid soils
- Listed by O M R I.
- Eliminates aluminum toxicity

Screen analysis before granulating

10 mesh	100%
20 mesh	99%
40 mesh	98%
60 mesh	89%
100 mesh	80%

Lime that does not pass a 10 - 20 mesh will take over 100 years to become 100% available. Material not passing a 40 mesh will take at least 25 years to become 100% available. 60 mesh material will take 5 years to become 100% available. Material passing a 100 mesh screen will be 100% available within 2 years.

Store in a dry place and away from children. Available in 25, 50 pound bags, tote bags and bulk.
